

Rates Management: Centralized Ocean Freight Rates & Contracts

Cargoo lets you centralize the management of ocean freight rates and contracts all in one place. The platform handles complex rate structures, surcharges, and free time agreements, which are easily accessed, displayed, and maintained within the platform. Collaborate with your colleagues and business partners in real time, and book and delegate shipments based on your current contract rates.

Advanced Capabilities

Manage carrier contracts, freight rates and free time agreements

Access the spot rate market.

Get the advantage of visibility and management of shipping line contract allocation.

Access allocation compliance analysis to see how well shipping lines perform against terms of service contracts.

Rate Management How It Works

Volume planning: Cargoo streamlines volume planning, contract-based lane proposals, data management and status tracking.

Benefits:

- ✓ Eliminate manual data processing
- ✓ Improve accuracy with data validation
- ✓ Facilitate collaboration with partners

Tendering Tool: Cargoo streamlines and automates the process of negotiating, managing, and finalizing carrier contracts with precision.

Benefits:

- ✓ Get full control over tender rounds
- ✓ Increase accuracy with seamless integration with volume planner
- ✓ Improve decision-making with data analysis and comparison tools

Carrier Contracts: The carrier contract module centralizes and manages all carrier agreements, ensuring accurate, accessible, and up-to-date contract information.

Benefits:

- ✓ Handle complex rate structures, surcharges, and free-time agreements. Easily accessed, displayed, and maintained.
- ✓ Access your contract rates & spot market
- ✓ Collaborate with your colleagues and business partners in real time.

Shipping: Cargoo enables your vendors and booking agents to arrange shipment directly with carriers or logistics providers, while giving you the overview required to control all activities and exceptions in your supply chain.

Benefits:

- ✓ Data-driven business decisions
- ✓ 50% Labor time reduction

Freight audit: Freight Audit automates the calculation and verification of logistics costs, ensuring accurate billing and financial transparency across shipments.

Benefits:

- ✓ Automatically calculate carrier costs for each shipment based on existing contracts.
- ✓ Integrates with finance systems for streamlined cost approvals and purchase order creation.
- ✓ FULL control and visibility over freight costs
